

Mohammed Idrees Ahmed al Hessi

Cyber Security Engineer

Personal Information:

Nationality: Palestine Date of Birth: Desember 30th, 2003
Marital Status: Single Address: Gaza
Phone Number: 0593230028
Email Address: mal53@smail.ucas.edu.ps

Objective:

An cyber security engineer with over 3 years experience in security systems and analyzing vulnerabilities. Currently expanding my skills in penetration testing and incident response. Seeking to contribute to a dynamic security team by enhancing cyber defense capabilities and implementing proactive security measures.

Practical Experience:

Practical Experience – Cybersecurity labs

Self-Study(TryHackMe, Hack The Box, PortSwigger) | 2024-Present

1. Completed multiple TryHackMe and Hach The Box rooms/boxes covering reconnaissance, scanning.
2. Conducted web application testing using Burp Suite (interception, scanning , intruder) , identified and exploited xss vulnerabilities.

Network Traffic Analysis – (netriders.academy) | 2025-Present

1. Experienced in network packet analysis using Wireshark to detect attacks, visualize suspicious network traffic, and produce incident-response reports.

2. Analyzed network packets with Wireshark to identify port-scanning attempts, suspicious ARP traffic, and DoS/DDoS attacks.

3. Identified port-scan patterns and unauthorized connections (e.g., SYN flooding, port scans) and analyzed protocol fields (TCP flags, malformed packets) to classify incidents.

4. Utilized filtering and followed TCP Stream features and generated visualizations to illustrate patterns and provide detailed remediation recommendations.

Educational Qualifications:

University College of Applied Sciences | 2021 -- present
Studied core cybersecurity principles including network defense, penetration testing, and incident response.
Completed practical labs and projects related to network analysis, ethical hacking, and system protection.

Languages:

Arabic: mother tongue

English: Good command in speaking and reading and writing

Courses:

1. ICDL Course
2. Security+, (netriders.academy)
3. eLearnSecurity Certified Incident Responder (eCIR), netriders.academy
4. Penetration testing student (PTS), Udemy, not completed

Strengths and Skills:

1. Network security analysis and packet inspection using Wireshark
2. Web application testing using Burp Suite
3. Vulnerability scanning and enumeration with nmap, gobuster, dirsearch
4. Knowledge of Incident Responder procedures, including log analysis

Certificates:

HarvardX

Verified Certificate

Maurilio Pugliesi

Professor

UniversityX

.Justine Doe, Ph.D

Professor

UniversityX

This is to certify that

Mohammed al heesi

successfully completed and received a passing grade in

CS50 Cybersecurity:CS50's Introduction to Cybersecurity

a course of study offered by HarvardX, an online learning
initiative of Harvard University

Valid Certificate ID

12345678901234567890

Verified Certificate

Issued Month / Year

Certificate of Completion

This Certificate is given to

محمد الهسي

For successfully completing course

eCIR Prep

Certification ID

Ahmed Sultan
Instructor
